

you can connect to the port with correct inscription with the command:

```
openssl s_client -connect localhost:30001
```

then feeding it the previous password which is:

```
8xCjnmgoKbGLhHFAZlGE5Tmu4M2tKJQo
```

will give you the answer.

password:

```
kSkvUpMQ7lBYyCM4GBPvCvT1BfWRy0Dx
```
